SCRATCH Beginners

Code and notes by Martha Fahy

Today's Ninja Challenge:

Make a Game Like **Breakout**

Important concepts we will use today.

Making Sprites
Move

Loops &
Decisions

Animation
& Sound

Variables &
Broadcasts

Steps to Make the Game

Make the **Bat** sprite,
write & test code to control it

Make the **Ball** sprite,
write code to make it move & animate

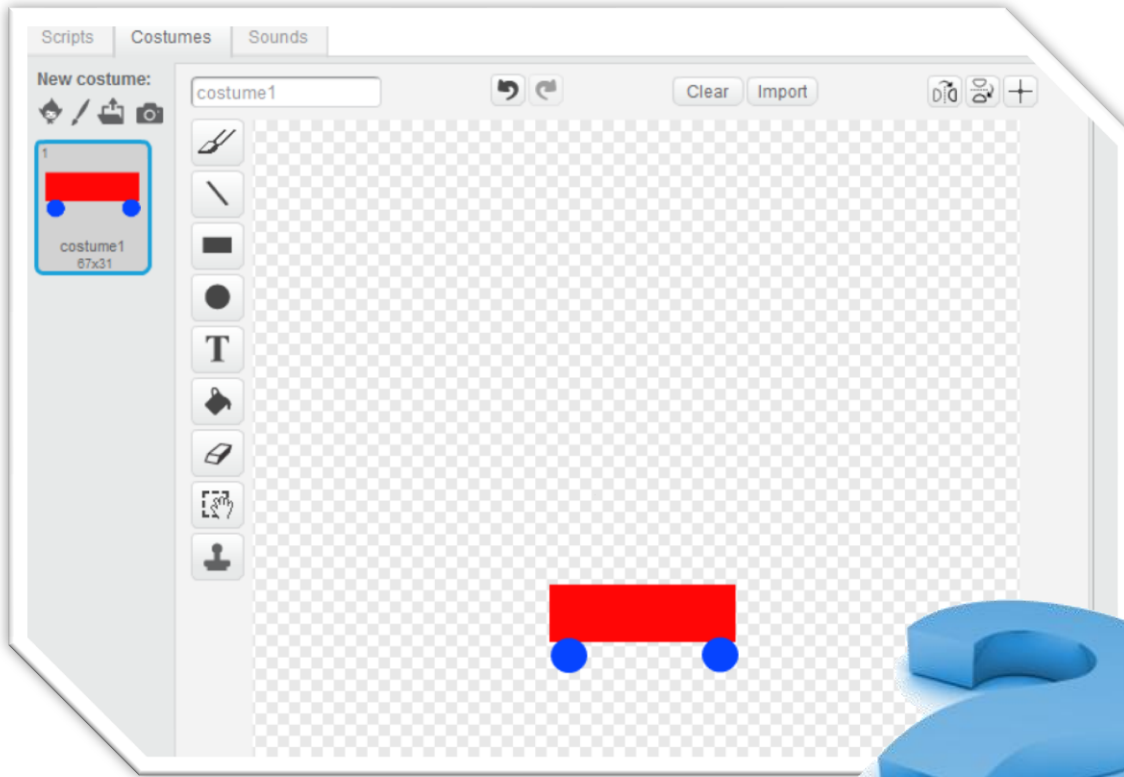

Add an **End Line** and a **Lives** variable;
Lose a life when ball hits line

Make a **Brick** sprite, write its code;
Test it works then **duplicate** it

*Your game will
have slightly
different steps.*

*Get one part
working before
moving on!*

Design the **Bat Sprite** & Code So You Control it

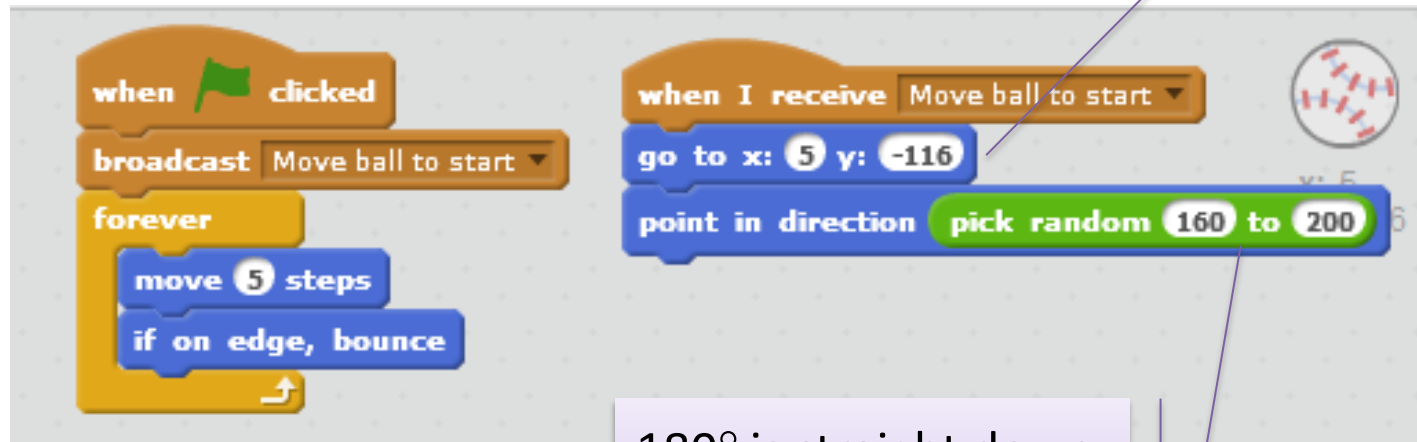

How would you
control it with
arrows instead?

Make the Ball Sprite & Basic Code to Move it

I used a standard image

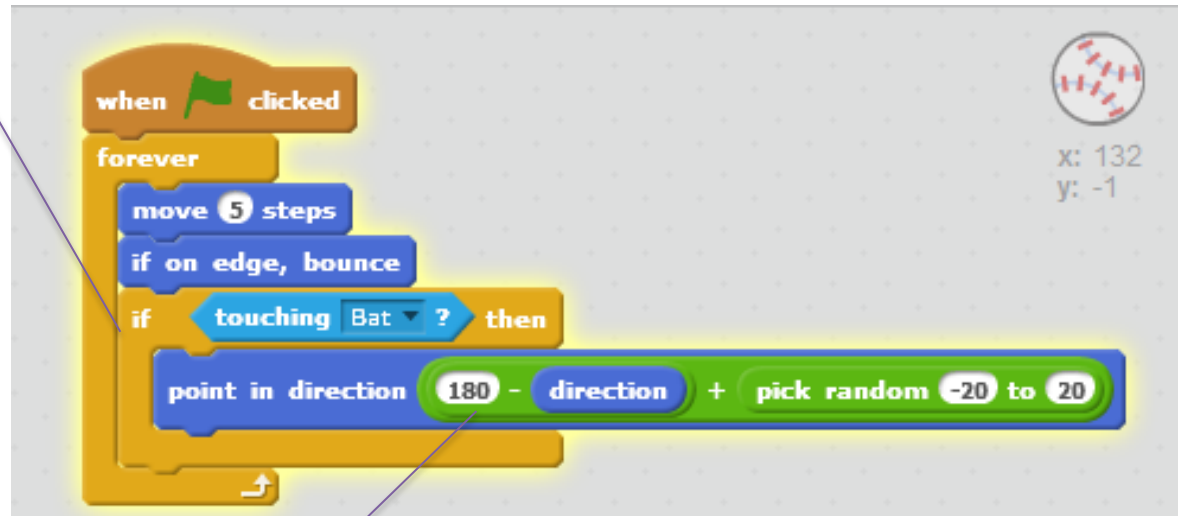

Will use this to reset position after losing a life

180° is straight down:
pick direction in
range 180 \pm 20

Code for the Ball Sprite to Bounce off the Bat

New block of code to bounce off bat

180° – Direction is opposite direction; add some randomness

Add an End Line

End Line:
Add Sprite
Or
Draw on Stage

Keep Track of Lives

- **Create Variable** for Lives
Start with Lives = 5
Stop if Lives = 0
- **If Ball touches End Line**
Reduce Lives by 1
Also
Reset position of ball -
broadcast 'move ball to start'

End Line added to bottom of the Backdrop

Design & Code a **Single Brick**

Need a variable for Score

Need code for **Ball** when it receives broadcast:

Make a sound effect,
Bounce off brick (copy code for bouncing off bat)

Design & Code a **Single Brick**

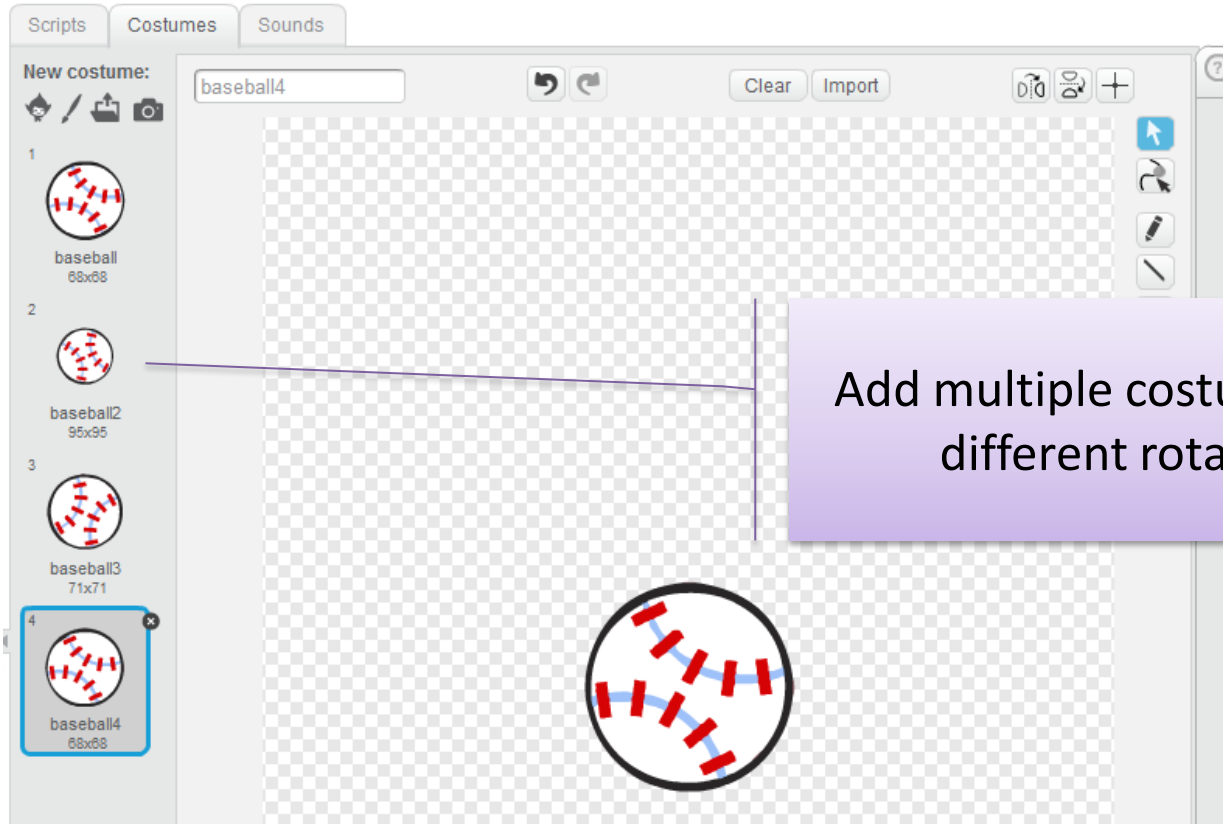

Make it fade slowly

Test the **Single Brick** & **Duplicate** it When You're Sure it Works

Animate the Ball

Add multiple costumes with different rotations

Keep switching between costumes:
how can you do this?

Add a Music Loop

At the End ...

Upload your project to the Scratch Website
