Lets Add our Sheep....and Goat

A variable is something that can be changed

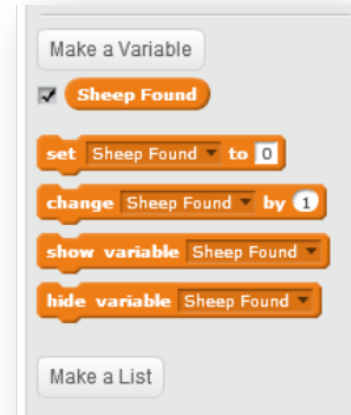

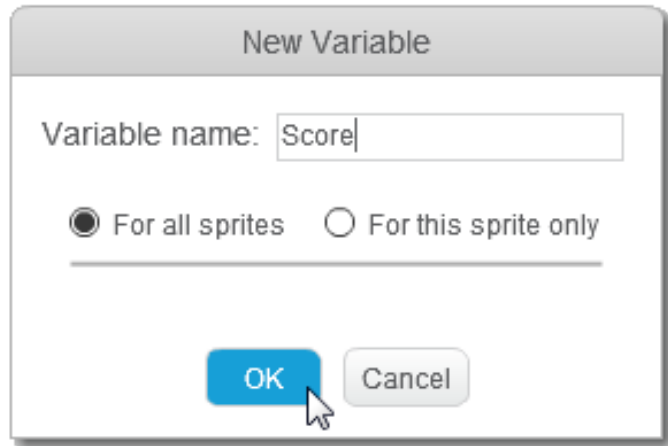

In computer programming we use variables to store information that might change and can be used later in our program.

Variables For Sheep Found

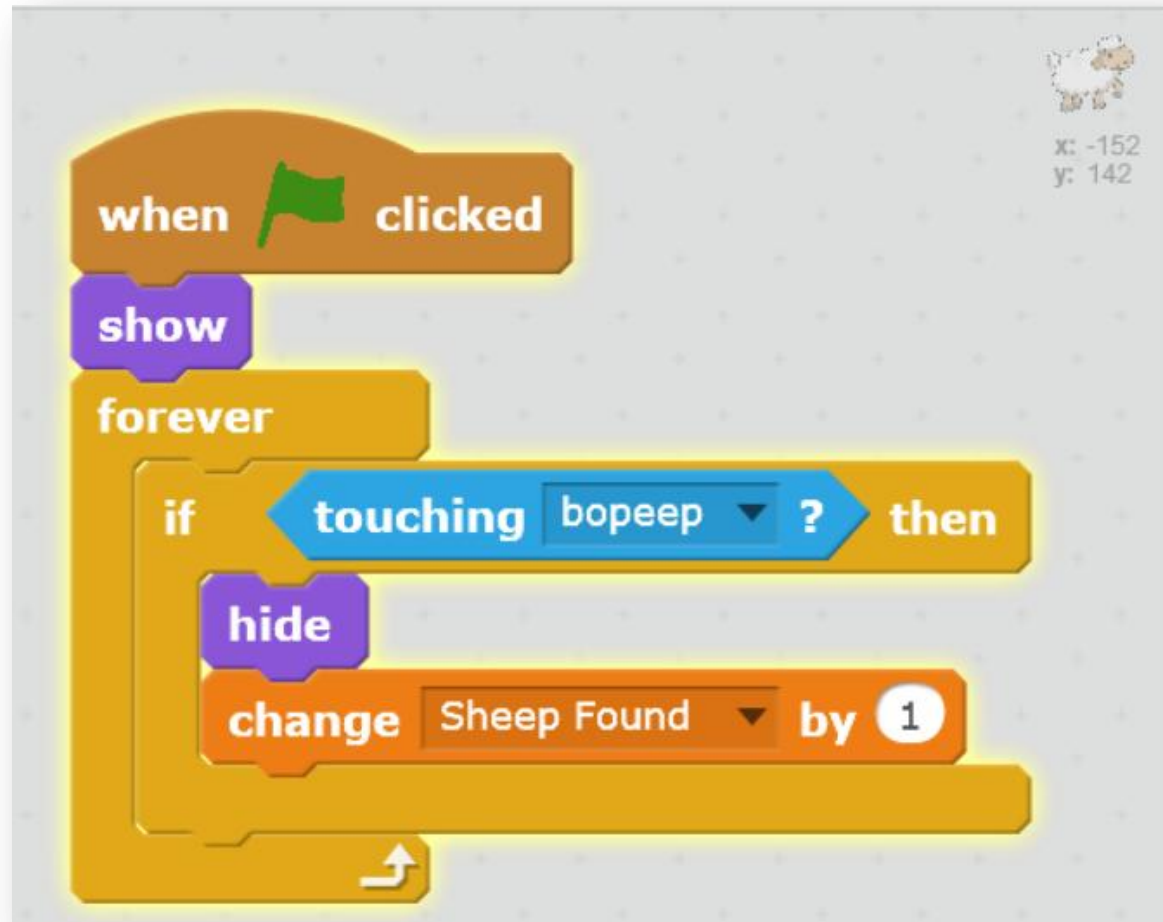

To keep track of a number, need a **Variable**:

- A key programming concept
- Stores a **Value** (number/text data):
this can vary
- Has a **Name** – this is fixed:
use this in the code to compare/change values

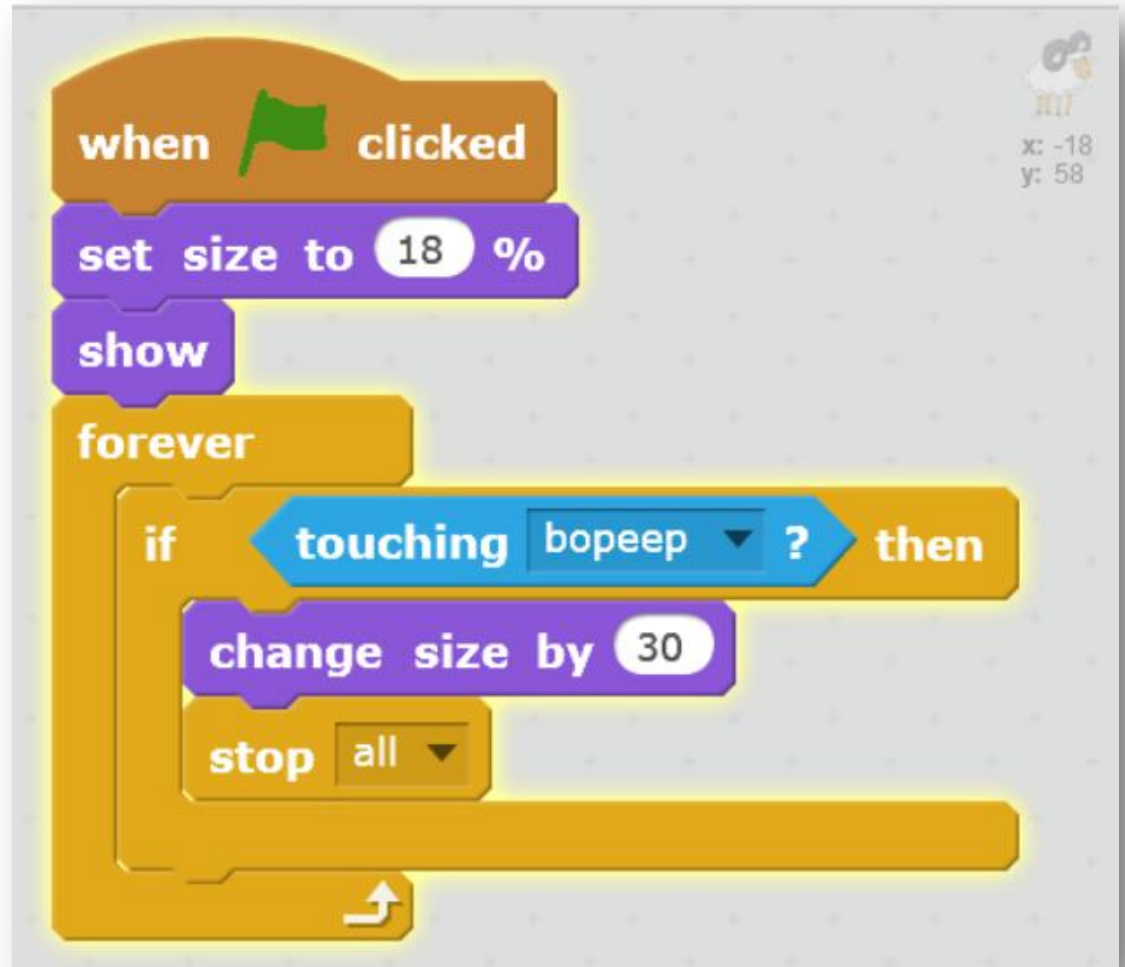

For Each Sheep

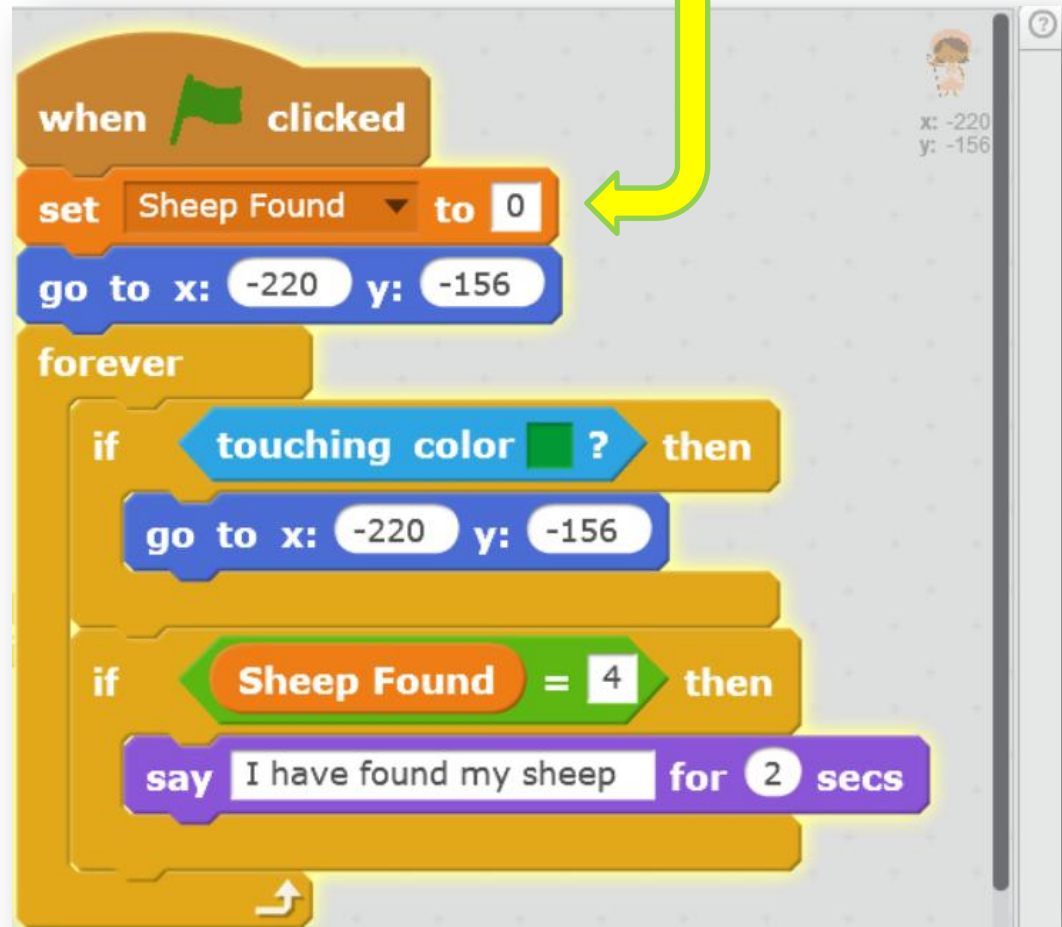

Don't forget the *GOAT*!

Set Sheep Found = 0

What happens when she finds her Sheep

At the End ...
